## Description

Hanseline – CHAIN LUBE Spray is a colourless special lubricant, which protects and preserves chains, cables and joints. It is centrifuge-resistant and has very good creeping and sticking properties. It strongly protects against wearing.

Hanseline – CHAIN LUBE Spray is a mixture of synthetic oils, adhesive additives and corrosion inhibitors, dissolved in aliphatic hydrocarbons and propellant propane-butane.

## Usage

First, clean the chain thoroughly with e.g. Hanseline CHAIN CLEAN. Then spray on chain, let the solvent evaporate, repeat if necessary – ready.

## Technical Data

form:	Aerosol, liquid
color:	colorless
odeur:	specific
Flammability:	Atomized spray and evaporated steam are highly flammable.
Self-flammable:	no
Oxidizing properties:	superheating
Danger of explosion:	When superheating containers may burst. Possibility of explosible steam-air composition.
Vapour pressure (inside can):	at 50°C max. 2/3 of can-test pressure
Density at 20 °C:	0,654
Water solubility:	no
Solvent content:	5-20 %
